

Incident Reports

The Authority categorizes incidents and accidents and the associated reporting into three types of investigations. An incident or accident will not be classified until sufficient facts are available to assess the potential for safety improvements and may require on-site evaluation or interviews.

Class “A” Investigations/Incidents

Defines an investigation that has a high probability of improving navigation safety, in that there is a significant potential for reducing the risk to persons, vessels or the environment.

Class “B” Investigations/Incidents

Defines an investigation that has a medium probability of improving navigation safety, in that there is a moderate potential for reducing the risk to persons, vessels or the environment.

Class “C” Investigations/Incidents

Defines an investigation that has a low probability of improving navigation safety, in that there is a limited potential for reducing the risk to persons, vessels or the environment.

The following table shows the actual number of incidents the Authority has recorded over the last five years.

Year	Incident Free Assignments	Total Incidents	Class A	Class B	Class C
2013	99.963%	5	0	0	5
2014	99.962%	5	0	2	3
2015	99.992%	1	0	0	1
2016	99.958%	5	0	0	5
2017	99.970%	4	0	0	4
