# LETTER FROM BOARD CHAIR AND CEO

March 30, 2026

The Honourable Steven MacKinnon  
Minister of Transport  
Tower C – Place de Ville  
330 Sparks Street  
Ottawa, ON K1A 0N5

Dear Minister:

On behalf of the Board of Directors and management of the Pacific Pilotage Authority (the Authority), we are pleased to submit our Annual Report for the year ended December 31, 2025.

In 2025, the Authority completed over 15,200 pilotage assignments – a record that underscores the growing demand for safe, efficient marine pilotage on Canada’s West Coast. This increase in activity was driven by higher vessel traffic and sustained energy exports and was managed while maintaining a high level of service and an industry-leading safety record. These results reflect the strength of the Authority’s operating model and the professionalism of the pilots and staff who deliver this essential service.

We continued to strengthen our operational capabilities throughout the year. The Helicopter Transfer Program (South) matured into a reliable component of service delivery for tankers carrying product from the Trans Mountain Pipeline. Also used on an ad hoc basis for other vessels under pilotage, it enhanced both marine safety and system efficiency, particularly in challenging weather conditions. At the same time, we advanced readiness for increased vessel traffic associated with major projects, including LNG Canada, through focused simulation, training, and operational planning. Investments in systems and processes are supporting more efficient coordination of pilotage services across a complex and geographically extensive operating area.

We also made solid progress on governance and regulatory priorities. We have actioned, implemented and reported on the Office of the Auditor General’s Special Examination

recommendations. Work with Transport Canada on pilotage waivers has resulted in a more practical, safety-focused approach aligned with local operating requirements. The Authority also continued to prepare for the implementation of the Quality and Safety Management System regulatory framework.

Operational performance remained strong across safety, reliability, and efficiency. Delays attributable to pilotage services remained low, and incidents continued to be rare. Maintaining this level of performance in a period of growth is a direct reflection of the experience, judgment, and commitment of our pilots, dispatchers, launch crews, and staff.

We continued to advance key government priorities, including accessibility, pay equity, official languages, and climate-related disclosure, alongside ongoing improvements to internal governance. This work supports transparency, accountability, and the long-term sustainability of the Authority.

Our partnerships remain central to our success. We work closely

with British Columbia Coast Pilots, Transport Canada, industry stakeholders, and other government departments to enable the continued smooth delivery of marine pilotage on Canada’s Pacific Coast. We also work closely with other Canadian pilotage authorities to support a coordinated national approach and to ensure the continued strength of Canada’s marine pilotage system. These relationships are particularly important as marine traffic evolves and operational demands increase.

***In 2025, the Authority completed over 15,200 pilotage assignments – a record that underscores the growing demand for safe, efficient marine pilotage on Canada’s West Coast.***

Looking ahead, the Authority is well positioned to support continued growth in marine transportation on the West Coast. As Canada advances priorities related to trade diversification, supply chain resilience, and the reliable movement of key exports, the importance of safe, efficient marine pilotage is increasingly evident. Our focus remains on maintaining strong safety performance, improving service delivery, and ensuring that our workforce, infrastructure, and systems are aligned with future demand.

We extend our sincere appreciation to the Authority's employees, our employee Fraser River Pilots, the British Columbia Coast Pilots, and members of the Board of Directors for their continued dedication and professionalism. We also thank Transport Canada and our partners for their ongoing collaboration and support.

Respectfully submitted,

Lorraine Cunningham  
Chair

John Wilson  
Chief Executive Officer

*The first year of  
helicopter service on the South Coast  
completed over 1,400 hoists*

# WHAT IS THE PACIFIC PILOTAGE AUTHORITY?

On Canada's west coast, commercial vessels greater than 350 gross tons and pleasure craft greater than 500 gross tons are required by law to use the services of a Canadian marine pilot. This requirement is set out in the *General Pilotage Regulations*, under the *Pilotage Act*, and ensures that vessels navigate safely in designated pilotage waters.

The Pacific Pilotage Authority ("the Authority") is a federal Crown corporation responsible for administering marine pilotage

services in these waters. Due to the complexity of our coastline, our jurisdiction spans the entire British Columbia coast and includes the Fraser River, making it the largest mandatory pilotage area in the world. Our unique coast-wide pilotage model enables the Authority to provide service in all ports on the West Coast, as well as to the cruise ships that transit the inside passage of BC.

The safe and efficient movement of ships prevents accidents, safeguards marine ecosystems and supports resilient supply chains.

## COMMITMENT TO RECONCILIATION

As a federal Crown corporation, the Authority supports the Government of Canada's commitment to advancing reconciliation, grounded in the recognition of Indigenous rights, respect for self-determination, and partnership with Indigenous

Peoples. The Pacific Pilotage Authority respectfully acknowledges the traditional territories of the many distinct First Nations on the British Columbia coast and the Fraser River where marine pilotage services are delivered.

## MANDATE

The mandate of the Authority is to establish, operate, maintain, and administer, in the interests of safety of navigation, an efficient pilotage service within the region set out in respect of the Authority, whilst aligning with the principles set out in the *Pilotage Act*.

# PRINCIPLES

The *Pilotage Act* sets out a framework for the provision of pilotage services in accordance with the following principles:

that pilotage services be provided in a manner that promotes and contributes to the safety of navigation, including the safety of the public and marine personnel, and that protects human health, property and the environment;

that pilotage services be provided in an efficient and cost-effective manner;

that risk management tools be used effectively and that evolving technologies be taken into consideration; and

that an Authority's pilotage charges be set at levels that allow the Authority to be financially self-sufficient.

# VISION STATEMENT

The Authority's vision is to lead a world-class marine pilotage service on the west coast of Canada.

Our vision is bold and ambitious, as are the team members who make up the Authority.

To achieve our vision, the Authority must demonstrate:

- An industry-leading safety record
- A culture of operational efficiency where customers receive value for fees paid and the Authority is financially self-sustaining
- A leadership role in the maritime sector at the regional and national levels

# MISSION STATEMENT

The Authority is dedicated to providing safe, efficient and cost-effective marine pilotage. We will do this by working in partnership with the marine pilots, the shipping industry and the communities in which we operate, to protect the environment and advance the interests of Canada and its people.

# CORPORATE VALUES

Management and board members review the Authority's corporate values to ensure their continued relevance and applicability.

The Authority's corporate values are as follows:

## Honesty/Integrity

We will ensure honesty and integrity in all aspects of our work. We share responsibility for being effective, accountable and acting appropriately. We consider the outcome of decisions for all those affected before we implement change. We act with visible integrity and openness and support each other in these actions.

## Positive Stakeholder Relations

We will work hard to maintain positive relations with all stakeholders including the shipping industry, the pilots and their respective organizations, our employees, the communities in which we operate and all other related individuals and organizations.

## Service Quality

We strive for excellence in all our activities. We continuously learn, develop and improve. We take pride in our work and in the services we provide to our clients and partners.

## Accountability/Responsibility

We are accountable, as individuals, team members and as an organization, for our actions and our decisions. We make effective and efficient use of the resources provided to us. We adhere to our policies and procedures, our mission and objectives, and to the regulations governing us. When our commitment to innovation is at odds with existing procedures, we will work within the system to achieve positive change and improvement.

## Adaptability and Innovation

We value innovation and creativity. We encourage and support originality and diversity of thought. As individuals and as teams, working with our internal and external partners, we welcome new ideas and methods to enhance our service and the use of our resources.

# STRATEGIC OBJECTIVES

The Authority's strategic objectives are laid out in its Strategic Plan for 2024 – 2029 and are as follows:

## 1. National Collaboration and Consistency

Work with Transport Canada, other Pilotage Authorities and key partners towards achieving alignment with Transport Canada's objectives as set out in the *Pilotage Act* for a coast-to-coast-to-coast pilotage program, while respecting regional models and expertise.

## 2. Pilotage NextGen

Establish a future vision for "Pilotage NextGen" that leverages technologies both for the Pilotage Authority and the piloting community taking into consideration input from key partners.

## 3. Workforce of the Future

Define, implement and embrace a new model for human capital as the "Workforce of the Future" for the Authority and pilotage on Canada's west coast.

## 4. Operational and Service Excellence

Commit to continuous improvement and enhancement of the Authority's services to our customers, whilst remaining financially responsible and sustainable.

# ACTIVITIES AND ACHIEVEMENTS FOR THE YEAR

## Safety focus

The PPA developed and began implementing a comprehensive plan to support the transition to the Quality and Safety Management System regulatory framework in preparation for the new regulations coming into force.

## Soaring high

Successfully completed first year of helicopter service on the South Coast with over 1,400 hoists, and expansion from daytime only to 24-hour operations.

## Empowering futures

The PPA's Kevin Obermeyer Scholarship was awarded to six students from traditionally underrepresented backgrounds enrolled in marine studies programs at BCIT.

# KEY ACTIVITIES IN 2025

In 2025, the results of key activities in support of achieving our strategic objectives were as follows::

OBJECTIVE	ACTIVITY	RESULTS
<p><b>Work with Transport Canada, other Pilotage Authorities and key partners towards achieving alignment with Transport Canada’s objectives as set out in the Pilotage Act for a coast-to-coast-to-coast pilotage program, while respecting regional models and expertise</b></p>	<p>Conduct regular meetings with Chairs and CEOs of all four pilotage authorities and be an active member of the National Pilotage Advisory Committee (NPAC)</p> <p>Work with Transport Canada to modify compulsory pilotage areas in support of the new Trans Mountain and LNG Canada projects and strengthen the requirements for the pilotage waiver program</p> <p>Work with Canadian Marine Pilots Association (CMPA) to strengthen relationship with PPA</p> <p>Work with Transport Canada, other pilotage authorities and the piloting community on the development of the Quality and Safety Management System (QSMS) regulations</p>	<p>Prepared and shared Marine Pilotage Incident Response Plan.</p> <p>Worked with Transport Canada to realign Pilotage Act Administration Fee allocation.</p> <p>Established collaborative efforts on pilot launch routing and fuel consumption optimization.</p> <p>Established collaborative efforts on common approach to climate and ESG reporting.</p> <p>Interim order renewed for extension of compulsory pilotage zone for outbound crude oil tankers.</p> <p>Interim order for LNG Carriers published for Area 4 (North Coast).</p> <p>Interim order <i>Respecting Waivers of Compulsory Pilotage</i> published.</p> <p>PPA Chair and CEO met with CMPA leadership.</p> <p>PPA shared common messages around critical role of pilotage in the efficient movement of marine commerce and in the safety of the environment.</p> <p>The PPA developed and began implementing a comprehensive plan to support the transition to the Quality and Safety Management System (QSMS) regulatory framework in preparation for the new regulations coming into force.</p>

OBJECTIVE	ACTIVITY	RESULTS
<p><b>Establish a future vision for Pilotage NextGen that leverages technologies both for the Pilotage Authority and the piloting community taking into consideration input from key partners (e.g., Transport Canada, PAs, pilots, First Nations, OGDs, Industry, Partners &amp; Coastal Communities).</b></p>	<p>Engage with key partners to advance smart port initiatives (e.g. Active Vessel Traffic Management (AVTM))</p> <p>Leverage the joint venture, Pilotage Simulator for Training and Research (PSTAR), in support of major marine projects on the West Coast</p> <p>Construct new pilot launch to upgrade aging fleet</p>	<p>Integration between the PPA’s dispatch system and the Vancouver Fraser Port Authority’s (VFPA) Active Vessel Traffic Management (AVTM) system has been developed, with implementation expected to commence in early 2026.</p> <p>BC Coast Pilots received training for LNG carriers operating in manoeuvres at the new LNG Canada terminal. Ship simulations for several major projects on the West Coast have been completed and additional simulations are scheduled.</p> <p>73% utilization of simulator vs scheduled availability. Profits generated will be used for future system upgrades.</p> <p>Request for proposals posted on Canada Buys website in August 2025. Proposals are currently being evaluated .</p>
<p><b>Define, implement and embrace a new model for human capital - Workforce of the Future - for the Authority and pilotage on Canada’s west coast.</b></p>	<p>Identify and document leading human capital practices relevant to marine pilotage</p> <p>Identify new/different approaches to address systemic barriers in hiring and testing of knowledge, skills and abilities (e.g. hiring of women, Indigenous peoples)</p> <p>Recruit students from various disciplines to complete a work term with the Authority</p>	<p>Revamped our employee professional development program to include funding for employees pursuing more advanced marine certifications based on industry research.</p> <p>Participated in advisory group for the Canadian Seafarers Pathway Study, a national study that analyzed workforce challenges and future workforce demands.</p> <p>Six BCIT Nautical Sciences students were awarded scholarships of \$2,500 each.</p> <p>PPA is working with Transport Canada to develop a program to help candidates gain sea time for maritime certifications through pilot boat work experience.</p> <p>BCIT data analytics students recently completed a practicum project analyzing fuel consumption and maintenance costs on our pilot launches.</p>

OBJECTIVE	ACTIVITY	RESULTS
<p><b>Operational and Service Excellence – Commit to continuous improvement and enhancement of PPA’s services to our customers while remaining financially responsible and sustainable with consideration of pilots, First Nations, OGDs, Industry, Partners, and Coastal Communities</b></p>	<p>Conduct transportation review internally to optimize pilot transportation to/from assignments</p>	<p>Seasonal air charter to Pine Island was utilized on a trial basis for pilot transportation to Prince Rupert instead of scheduled commercial flights. Results being analyzed to determine whether to continue with the charter to Prince Rupert on a regular basis.</p>
	<p>Implement helicopter program in the South (Trans Mountain) and the North</p>	<p>Successfully completed first year of helicopter service on the South Coast with over 1,400 hoists, and expansion from daytime only to 24-hour operations.</p> <p>A week-long trial was conducted in the north, offshore from Prince Rupert, in December 2025 to test operational capabilities for pilot transfers via helicopter.</p>
	<p>Complete 2025 enhancements to the recently implemented Pilot Dispatch and Management System (PDAMS), including digitalization of pilot data</p>	<p>Contract signed with software development company to create pilot training module; development work commenced in Q3 2025.</p>
	<p>Investigate costs and benefits of implementing a Human Resources Information System (“HRIS”)</p>	<p>Costs/benefits of an HRIS and potential solutions have been reviewed. Selected option to be implemented in 2026.</p>
	<p>Strengthen relations with First Nations and coastal communities</p>	<p>The Authority advanced several activities to strengthen engagement with Indigenous communities, including the development of a formal territory acknowledgement, Indigenous cultural safety learning for management and the board, engagement with the Heiltsuk Nation during a community visit to Bella Bella, and governance work to establish an Indigenous Relations Committee.</p>

## Key Performance Indicators

The performance indicators of the Authority are regularly reviewed and assessed by the Board of Directors. Part of the assessment is based upon certain key performance indicators (KPIs) which are listed below. The Authority shares the KPIs with its stakeholders.

### RESULTS FOR 2025

	Goal	Actual	Prior Year
<b>Safety</b>			
1. Incidents on vessels under pilotage (% incident free)	1 (99.9%)	<b>3 (99.9%)</b>	1 (99.9%)
2. Incidents on pilot launches (% incident free)	1 (99.9%)	<b>1 (99.9%)</b>	0 (100%)
3. Pollution incidents on pilot launches	0	<b>0</b>	0
<b>Reliability</b>			
4. Number of delays caused by pilots (% delay free)	1 (99.9%)	<b>2 (99.9%)</b>	8 (99.9%)
5. Number of delays caused by dispatch errors (% delay free)	1 (99.9%)	<b>0 (100%)</b>	1 (99.9%)
6. Number of delays caused by launches (% delay free)	1 (99.9%)	<b>1 (99.9%)</b>	1 (99.9%)
7. Total number of delays (% delay free)	3 (99.9%)	<b>3 (99.9%)</b>	10 (99.9%)
<b>Efficiency: Pilots</b>			
8. Complaints regarding pilot service level [number of complaints/number of assignments]	0%	<b>&lt; 1%</b>	< 1%
9. Callbacks as percentage of assignments	2.5%	<b>1.9%</b>	2.5%
10. Annual assignments per pilot			
a) Coastal	107	<b>129</b>	118
b) Fraser River	120	<b>117</b>	135
11. Annual utilization of pilots – terminal delays [hours delayed at terminal/total hours on assignment]	5%	<b>1%</b>	2%
12. Annual utilization of pilots – cancellations [number of cancellations/number of assignments]	8%	<b>8%</b>	8%
<b>Efficiency: General</b>			
13. Average number of working days to acknowledge all complaints	3 days	<b>1 day</b> (6 complaints)	4 days (1 complaint)
14. Invoice disputes related to disputed assignment details	1%	<b>&lt; 1%</b> (2 disputes)	< 1% (3 disputes)
<b>Financial</b>			
15. Average revenue/cost per assignment			
a) Revenue	\$ 10,162	<b>\$ 10,223</b>	\$ 9,768
b) Cost	\$ 10,137	<b>\$ 9,900</b>	\$ 9,517
c) Profit (loss)	\$ 25	<b>\$ 323</b>	\$ 251
16. Maintain adequate reserves (cash and investments)	\$ 21M	<b>\$ 22M</b>	\$ 17M
17. Accounts receivable - % of invoices under 30 days	95%	<b>99%</b>	99%
18. Working capital ratio – current assets / current liabilities	1.0	<b>1.3</b>	1.2

## Five year financial summary

The table below provides a historical financial summary of the Authority for the past five years from 2021 through 2025.

<b>Financial Results (\$'000)</b>	<b>2021</b>	<b>2022</b>	<b>2023</b>	<b>2024</b>	<b>2025</b>
Revenues	84,561	105,632	123,342	137,607	155,427
Expenses	(86,499)	(104,702)	(117,587)	(134,069)	(150,508)
Profit (Loss)	(1,938)	930	5,755	3,538	4,919
<b>Financial Position (\$'000)</b>					
Current Assets	13,988	14,664	20,279	23,074	27,485
Current Liabilities	(13,291)	(13,470)	(15,849)	(19,792)	(21,073)
Net Working Capital	697	1,194	4,430	3,282	6,412
Property and equipment	16,600	17,257	18,319	40,859	38,454
Borrowings (non-current)	5,285	4,805	4,498	4,185	3,334
Lease liabilities (non-current)	1,303	2,359	2,139	20,758	17,517
<b>Number of Assignments</b>					
Coastal	11,101	11,897	12,335	12,873	13,953
River	988	999	1,089	1,215	1,250
<b>Average Number of Pilots (full-time equivalents)</b>					
Coastal	112	121	126	128	134
River	9	9	9	9	12
<b>Revenue per Assignment</b>					
Coastal	\$ 7,021	\$ 8,309	\$ 9,227	\$ 9,816	\$ 10,345
River	\$ 6,379	\$ 6,398	\$ 7,037	\$ 7,191	\$ 7,378

# ORGANIZATIONAL STRUCTURE OF THE AUTHORITY

The Authority is managed by the CEO who reports to the Board.

There are 14 management employees, 12 full-time and three part-time employee river pilots, 13 full-time and ten casual dispatchers, four full-time and six casual/part-time administrative staff, and 28 full-time and 37 casual launch employees.

In addition, the Authority contracts coast pilots from BC Coast Pilots, a private company of entrepreneur pilots. The number of coast pilots has increased slightly from year to year, and in 2025 there were 134.

The Authority's organization chart below illustrates its reporting structure.

The Authority has prepared succession plans for senior management positions. These plans outline the recruitment process, skills criteria, and timelines in the event of personnel change.

Government of Canada

# CORPORATE GOVERNANCE

Corporate governance ensures the responsible management of the Authority's business and corporate affairs, including financial self-sufficiency, through well-defined policies and oversight.

As a Crown corporation, the Authority operates at arm's length from the Government of Canada. While the federal government provides policy direction, the Authority's Board of Directors sets the strategic direction, establishes organizational goals, and monitors their implementation. The Authority reports to Parliament through the Minister of Transport.

The Board consists of seven members, of which six are women, including two Indigenous members. The Chair is appointed by the

Governor in Council on the recommendation of the Minister of Transport, while Board Directors are appointed by the Minister of Transport with Governor in Council approval.

The Board has constituted several committees to oversee key areas of the Authority's work. These committees are chaired by a Board member, have terms of reference and mandates and report directly to the Board on a regular basis.

The Authority is led by the CEO who reports to the Board through the Chair. The governance chart on the following page indicates the reporting structure.

## BOARD COMMITTEES

- 1. Finance and Audit Committee (FAC)** – this committee is chaired by a Board member and includes at least three additional Board members. It meets six times per year, with additional meetings as needed. Members are expected to be financially literate. Its mandate includes oversight of financial matters, financial reporting, external audit, internal audit, compliance with the *Financial Administration Act* and the Authority's enterprise risk management framework.
- 2. Governance and Nominating Committee (GNC)** – this committee consists of three Board members and is chaired by the Board Vice-Chair. It meets as needed, as determined by the Chair. It ensures good corporate governance practices are followed and identifies suitable candidates for Board appointments according to merit-based selection criteria.
- 3. Human Resources Committee (HRC)** – this committee comprises three Board members, as well as the CEO and the Chief Human Resources Officer, who are non-voting members. The committee meets as needed, as determined by the Chair. The HRC oversees the Chief Executive Officer's (CEO) Performance Management Program (PMP) and compensation, as well as executive development planning. It also ensures that the management of human resources aligns with best practices and complies with relevant legislation and regulations.
- 4. Pilot Training and Examination Committee (PTEC)** – this committee meets four times per annum and additionally, as required. Its mandate is to conduct pilot examinations and review training programs for pilots. It is chaired by a Board member and includes members of the Authority's management and representatives of both pilot groups. A Committee of Examiners is established for the purpose of conducting pilot examinations.
- 5. Communications and Engagement Committee (CEC)** – this committee was chaired by a Board member and included three other Board members, as well as the CEO and Director of Communications and Engagement. It met four times per year and oversaw the strengthening of the Authority's communications with external audiences and relationship building with Indigenous and coastal communities and key stakeholders. The committee was disbanded at the end of 2025, with its activities assumed by staff. In January 2026, the Board established the Indigenous Relations Committee (IRC) to provide dedicated oversight of the Authority's work with Indigenous communities.
- 6. Information Technology Oversight Committee (ITOC)** – this sub-committee of the FAC is chaired by a Board member and is comprised of a second Board member and members of the Authority's management team. It meets four times per year and as required. The committee oversees the identification and mitigation of risks, including IT project and system risks and cybersecurity risks, arising from the implementation and use of information technology. It also oversees the development of a five-year IT plan/strategy and annual IT action plans.

The Board’s remuneration, expense reimbursements and attendance at meetings in 2025 is summarized in the tables below:

<b>Board Members</b>	<b>Retainer Earned</b>	<b>Per Diems</b>	<b>Travel or Training Reimbursements</b>	<b>Value of any other taxable benefit</b>	<b>Total</b>
Lorraine Cunningham, Chair	\$ 6,700	\$ 67,340	\$ 18,320	Nil	\$ 92,360
Kathy Bright, Vice Chair	5,700	25,480	1,931	Nil	33,111
Al Ranger	3,400	17,680	6,721	Nil	27,801
Billie Raptis	3,400	19,240	190	Nil	22,830
Marilyn Slett	3,400	5,720	-	Nil	9,120
Joely Viveiros	3,400	5,980	-	Nil	9,380
Guangbin Yan	3,400	14,300	32	Nil	17,732
<b>TOTAL</b>	<b>\$ 29,400</b>	<b>\$ 155,740</b>	<b>\$ 27,194</b>		<b>\$ 212,334</b>

The Governor-in-Council establishes the remuneration paid to the Chair, other Board members and the Chief Executive Officer. The remuneration of the Chair and other Board members follows the Government’s Remuneration Guidelines for Part-time Governor in Council Appointees in Crown corporations and is pursuant to section 108 of the *Financial Administration Act*. Annual retainers are

paid to the Chair of \$6,700, the Vice-Chair \$5,700 and all other Board members \$3,400 each. All Board members also receive a per diem of \$260 for attending each regular, committee or Authority-related meetings. Board members are reimbursed for all reasonable out-of-pocket expenses, including travel, accommodations, and meals, incurred in the performance of their duties.

## Human Resources

The Authority is led by an experienced leadership team, supported by dedicated operations and administrative staff. The Authority cultivates a supportive workplace through open communication with union leadership and by actively soliciting employee feedback through site visits and town halls.

A key focus is promoting diversity, equity, and inclusivity across the organization. In March 2025, the Authority hosted a Women’s Day event which brought women from across the organization together for a leadership development session. Later that summer, the management team participated in inclusive leadership training, including learning on how unconscious bias can influence recruitment and talent development decisions.

The Authority remains committed to being barrier free and to providing accessible and inclusive services for employees and internal and external stakeholders. In accordance with the *Accessible Canada Act*, a new accessibility plan was published on December 31, 2025. Developed through a broad consultative process involving employees across the organization and a panel of persons with disabilities, the plan outlines practical actions to improve accessibility at the Authority, including targeted initiatives to strengthen mental health supports and enhance digital accessibility.

Supporting diversity and inclusion extends beyond the organization and into the broader maritime industry. In 2025, the Authority awarded six students enrolled in the British Columbia Institute of Technology Nautical Sciences and Bridge Watch Rating programs a total of \$15,000 through the Captain Kevin Obermeyer Scholarship. The Bridge Watch Rating entrance award prioritizes students from backgrounds that have been historically underrepresented in the maritime sector, helping to reduce barriers to entry and broaden participation in the industry.

Building internal capacity and supporting professional growth are central to the Authority’s workforce strategy.

In spring 2025, three BCIT students completed a practicum with the Authority, conducting research on professional development programs within the maritime industry. Their work resulted in a white paper and presentation examining strategies to address workforce challenges by developing internal talent. This research informed a revamped Training and Professional Development

Policy, under which employees may apply for funding to pursue educational and professional goals, including advanced maritime certifications.

The Authority continues to maintain labour stability and currently has three collective agreements in operation with the International Longshore and Warehouse Union and the Canadian Merchant Service Guild:

- the Canadian Merchant Service Guild, representing all employee pilots (15 employees), expires January 31, 2027;
- the Canadian Merchant Service Guild, representing all launch masters and engineers (59 employees), expires March 31, 2028;
- the International Longshore and Warehouse Union, Local 520, representing all deckhands, dispatchers and administrative staff (38 employees), expires March 31, 2027.

## Recruitment and Training of Pilots

The Authority’s Pilot Training and Examination Committee (PTEC) selects, assesses and trains marine pilots in accordance with its Quality Assurance Procedures and the General Pilotage Regulations to ensure a highly qualified and skilled workforce. The selection and training process for marine pilots involves:

- reviewing the potential candidates’ medical fitness, maritime qualifications, and local area sea time for compliance with the *General Pilotage Regulations*;
- potential candidates’ participation in the Pilot Familiarization Program as required by the *General Pilotage Regulations*;
- examination of candidates who meet both requirements above;
- apprenticeship and training before Transport Canada licenses the candidates; and
- progression and recurrent training during their piloting career.

Candidates who meet the regulatory pre-requisites are enrolled into the Pilot Familiarization Program which is administered by the Authority. This program is restricted to a maximum enrolment of 40 candidates at any given time. The program allows the potential pilot candidates to

complete familiarization trips along with licensed pilots; it also helps enhance their coastwide knowledge and improves their performance in the examinations. At the end of 2025, enrolment in the program was at near maximum capacity.

Marine pilot entry exams are conducted twice each year to assess potential candidates for the necessary knowledge,

***In 2025, the Authority awarded six students enrolled in the British Columbia Institute of Technology Nautical Sciences and Bridge Watch Rating programs a total of \$15,000 through the Captain Kevin Obermeyer Scholarship***

experience, and skills required to perform the job. The exam process consists of a series of two written and one oral exam that test candidates' general knowledge of ships and local knowledge of the BC coast or Fraser River.

The minimum duration of the apprenticeship periods for coast pilots and Fraser River pilots are nine months and five months, respectively. Both apprenticeship durations can be extended up to a maximum of twenty-four months. Upon successful completion of their apprenticeship, candidates receive a pilot licence from Transport Canada.

The PTEC regularly reviews training facilities to ensure that training standards and the instruction level are relevant, effective, and valid.

The cost for training each apprentice is approximately \$230,000, which includes remuneration, course fees and travel expenses. These costs are borne entirely by the Authority. If the apprenticeship period extends to twenty-four months, the costs increase to approximately \$420,000 per apprentice.

The Authority works with the BC Coast Pilots and Fraser River pilots to ensure sufficient apprentices start each year to allow for retirements as well as forecasted assignment growth. Three coast and two river apprentice pilots were taken on during 2025.

The Authority budgets for licensed pilot training each year. The pilots are provided with familiarization and skills-enhancement training.

Apprentice pilot (coast and river) training during the year 2025 included:

- Seven coast and two river pilot apprentices received training for tethered tug manoeuvres, Bridge Resource Management (Pilots) (BRM-P), and ship handling training using manned ship-models,
- Four coast and two river pilot apprentices received training for ship handling training using our in-house simulator, Portable Pilotage Units, and azimuth podded propulsion systems

Licensed pilot training during the year 2025 included:

- Panamax-size ship handling training using manned ship models for eight coast pilots
- Advanced ship handling training using manned ship models for twelve coast pilots and two river pilots
- Azimuth propulsion system training for four coast pilots and azimuth propulsion refresher training for fourteen coast pilots, and
- BRM-P refresher training for thirty-four coast pilots.

### Pilot Examinations and Eligibility List

The Authority conducted two pilot examination sessions in 2025. Thirty-one coast and five river candidates attempted the examinations of which ten coast and four river candidates were successful.

During 2025, eight coastal and three river pilots received their Class II licence, and eight coastal pilots received their Class I licence. New pilots receive a Class II licence on successful completion of their apprenticeship. The Class II licence is upgraded to a Class I licence on successful completion of the first year of piloting.

Candidates who meet all regulatory requirements and pass the examinations are placed on an eligibility list as required by the regulations. As new pilots are required, apprentice pilots are enrolled in the apprenticeship program and they are removed from the eligibility list. As of December 31, 2025, there were five coastal candidates and four river candidates on the respective eligibility lists.

*As of December 31, 2025,  
there were five candidates  
on the coastal pilot eligibility list  
and four on the river pilot  
eligibility list.*

# ENTERPRISE RISK MANAGEMENT

## Enterprise Risk Management

An Enterprise Risk Management (ERM) program is incorporated into the Authority's strategy, which helps in cultivating a culture of risk awareness throughout the organization. A comprehensive risk framework has been developed and all material risks are assessed, ranked and monitored regularly.

Key risks are overseen by the Board, or an appropriate Board Committee and reviewed annually. Other risks are overseen by senior management.

The Authority is committed to ensuring that all material risks have appropriate mitigation measures in place and are reviewed comprehensively on a regular basis. Detailed risk descriptions and mitigation measures are kept current by the risk owners.

At December 31, 2025, the six highest-rated key risks identified in the Authority's risk register are:

- Inability to source and train sufficient qualified pilot candidates
- Inability to cover committed financial obligations and overhead because of a decrease in assignment volumes
- Compromise of the confidentiality, integrity or availability of information
- Vessels are granted pilotage waivers incorrectly by the Authority or vessels operating with a valid pilotage waiver do not continue to comply with the waiver conditions
- Key members of the Authority's management team depart without a robust succession plan or knowledge retention in place
- Relations with indigenous communities could be damaged because of a marine incident or by inadequate engagement on operational decisions

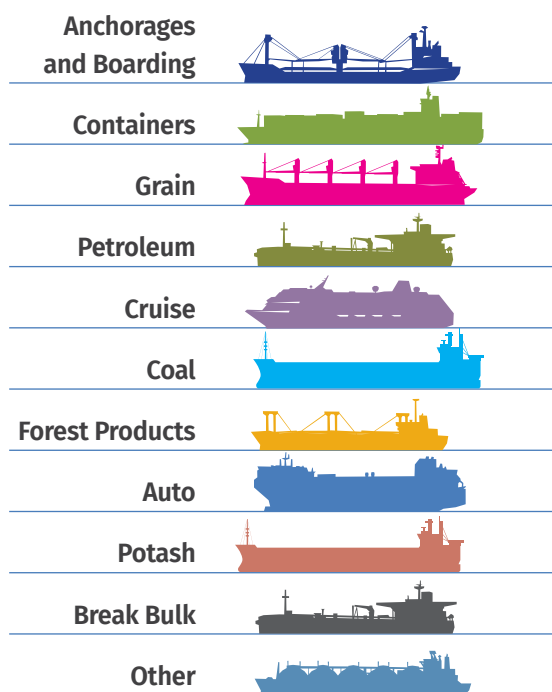

# OPERATIONAL REVIEW AND FINANCIAL ANALYSIS

## Traffic Analysis

The chart and table below highlight pilotage assignments by product sector. The container and grain ship sectors, as well as petroleum, are the largest and each accounted for 12% of our assignment volumes in 2025. The Anchorages and Boarding category represents the movement of vessels between anchorages and berths.

PRODUCT SECTORS BY NUMBER OF ASSIGNMENTS IN 2025

ANNUAL ASSIGNMENTS<sup>1</sup> BY VOLUME

	2021		2022		2023		2024		2025	
Anchorage & Boarding	3,030	25%	3,037	24%	3,029	23%	3,385	24%	3,542	23%
Containers	2,143	18%	1,984	15%	1,741	13%	1,867	13%	1,894	12%
Grain	1,787	15%	1,291	10%	1,750	13%	1,894	13%	1,872	12%
Petroleum	283	2%	301	2%	299	2%	954	7%	1,766	12%
Cruise <sup>2</sup>	-	0%	1,267	10%	1,377	10%	1,308	9%	1,275	8%
Coal	1,074	9%	1,160	9%	1,246	9%	1,186	8%	1,158	8%
Forest Products	903	7%	943	7%	865	6%	809	6%	850	6%
Auto	585	5%	622	5%	747	6%	763	5%	771	5%
Potash	312	3%	375	3%	405	3%	284	2%	367	2%
Break bulk	268	2%	308	2%	312	2%	353	3%	291	2%
Other	1,704	14%	1,608	13%	1,653	13%	1,285	10%	1,417	10%
<b>GRAND TOTAL</b>	<b>12,089</b>	<b>100%</b>	<b>12,896</b>	<b>100%</b>	<b>13,424</b>	<b>100%</b>	<b>14,088</b>	<b>100%</b>	<b>15,203</b>	<b>100%</b>

<sup>1</sup> Coastal and Fraser River assignments

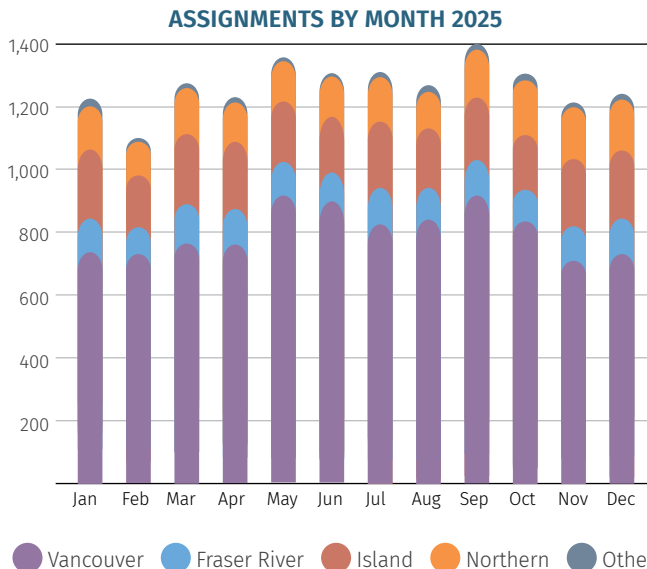

<sup>2</sup> Cruise ship season cancelled in 2021 during global pandemic

Long pilotage trips exceeding eight hours or 105 nautical miles require the services of a second pilot. Safety considerations remain paramount as the pilot is only allowed to work a maximum of eight hours before an appropriate rest break is required. Most cruise ships heading north or south through the Inside Passage fall into this category, along with certain northern assignments, such as vessels bound to/from Kitimat and Stewart. Tankers, which have tugs tethered to them, also require the services of two pilots and potentially three pilots for assignments of longer duration, such as LNG tankers in the north.

During 2025, the Authority completed a record number of ship movements, with 13,953 coastal assignments (excluding second pilot assignments) and 1,250 river assignments.

The Authority’s monthly pilotage assignment pattern is usually very consistent year over year. Normally there is a seasonal spike in the coastal assignments due to the cruise ship sector during the months of May through September (particularly on Vancouver Island and the Port of Vancouver).

The Authority categorizes its assignments into four key traffic areas: Vancouver, Fraser River, Island (Vancouver Island) and Northern (Prince Rupert, Kitimat and Stewart).

Vancouver includes Vancouver Harbour, Roberts Bank and Deltaport terminals and is the largest assignment area, with 51 berths and 34 anchorages that we service on a regular basis. Traffic in this area increased 7% from 9,037 assignments in 2024 to 9,686 in 2025, which was primarily attributed to increases in container, grain and tanker traffic.

The Fraser River is home to ten active berths that handle automobiles, containers, bulk, and break-bulk products, and includes the Vancouver Airport Fuel Facility. Ships travelling to or from the river require a coastal pilot for transit to and from the Sand Heads boarding station at the mouth of the Fraser River. Once inside, a river pilot takes over for the transit to and from the berths. Traffic increased 3% from 1,215 assignments in 2024 to 1,250 in 2025.

The Island area, with 36 berths and 63 anchorages, includes the harbours at Victoria and Nanaimo, as well as ports around Vancouver Island, including Port Alberni and Port McNeil. It also includes several anchorages in the Southern Gulf Islands. The number of assignments increased 9% from 2,241 in 2024 to 2,445 in 2025. Many cruise ships stop in Victoria and those heading north to Alaska, or returning, usually require a pilot change at Pine Island, off the northern tip of Vancouver Island.

The Northern area, which includes the Port of Prince Rupert and marine terminals at Kitimat and Stewart, has 11 berths and 36 anchorages. Most assignments are in the Prince Rupert region which primarily handles containers, grain, coal, logs and wood pellets. Traffic increased 14% from 1,470 in 2024 to 1,678 in 2025, largely due to the start of operations at the LNG Canada terminal in Kitimat.

## Incident Reporting

The *General Pilotage Regulations* require licensed pilots to report all incidents to Transport Canada and the Transportation Safety Board.

The terms of reference for the Authority’s Pilot Training and Examination Committee include reviewing incidents to determine training and familiarization opportunities for pilots.

The table below shows the actual number of incidents the Authority has recorded over the last five years.

Year	Class A	Class B	Class C	Total Incidents	Total Assignments	Incident Free Assignments
2021	-	-	7	<b>7</b>	12,089	<b>99.94%</b>
2022	-	-	8	<b>8</b>	12,896	<b>99.94%</b>
2023	-	-	2	<b>2</b>	13,424	<b>99.99%</b>
2024	-	-	1	<b>1</b>	14,088	<b>99.99%</b>
2025	-	-	3	<b>3</b>	15,203	<b>99.98%</b>

Although the Authority is no longer responsible for investigating any incidents, the Authority classifies incidents which are similar in nature to those in the past when the Authority did perform investigations, as follows:

### Class “A” Incidents

Defines an incident that causes damage or losses as below:

- Human: Multiple deaths or multiple people with serious long-term injury
- Property: Damage to property that ceases operations for a period exceeding one month or financial loss exceeding \$50 million
- Vessel(s): Vessel sinks or sustains so much damage that it is a constructive total loss
- Environmental: Incident causes sustained long-term harm to environment (i.e. damage lasts greater than a month)

### Class “B” Incidents

Defines an incident that causes damages or losses as below:

- Human: Some people with serious long-term injury and multiple minor injuries
- Property: Damage to facilities is such that the operations cease for not more than one month or financial loss of up to \$50 million
- Vessel(s): Vessel grounds or sustains significant damage with dry docking required and loss of operations for not more than one month
- Environmental: Incident causes medium term harm to environment, (i.e. damage lasts not more than one month)

### Class “C” Incidents

Defines an incident that causes damage or losses as below:

- Human: Single or multiple minor injuries requiring on site first aid and/or off-site treatment
- Property: Minor damage to facilities with no effect or damage of a minor nature causing operations to cease for no longer than 72 hours
- Vessel(s): Minor damage with no effect or damage resulting in a loss of operations of no more than 72 hours
- Environmental: Incident causes minimal or intermittent harm to environment over a period of time, (i.e. damage lasts no greater than a day)

## Financial Analysis for 2025

For 2025 the Authority recorded revenues of \$155.4 million and a profit of \$4.9 million.

REVENUES AND EXPENSES BY YEAR (IN \$'000'S)

On January 1, 2025, the Authority implemented a 2.5% increase on average in our service charge rates (4.6% in 2024). Most of our costs are linked through contracts and collective agreements to changes in inflation, as measured by the Consumer Price Index for Vancouver. Therefore, service charge increases for 2025 reflected the prevailing lower annual rate of inflation compared to the preceding year. The increases in charges were planned with consultation and support from industry.

The following table details the comparisons of the major revenue and expense categories from the Authority's unaudited operating statements for 2025 and 2024.

	2025 Actual \$'000	2024 Actual \$'000	Change %	2025 Plan \$'000	Variance %
Coastal pilotage revenue	107,381	95,951	12%	94,184	14%
Coastal pilotage contract expenses	(96,032)	(84,804)	13%	(82,763)	-16%
<b>Coastal pilotage margin</b>	<b>11,349</b>	<b>11,147</b>		<b>11,421</b>	
Launch and helicopter revenue	24,304	19,935	22%	24,585	-1%
Launch and helicopter expenses	(17,183)	(15,670)	10%	(17,529)	2%
<b>Launch and helicopter margin</b>	<b>7,121</b>	<b>4,265</b>		<b>7,056</b>	
Travel revenue	14,085	12,107	16%	11,946	18%
Pilot travel expenses	(10,883)	(10,267)	6%	(10,177)	-7%
<b>Travel margin</b>	<b>3,202</b>	<b>1,840</b>		<b>1,769</b>	
River pilotage revenue	5,339	5,149	4%	5,200	3%
River pilot wages and benefits	(5,304)	(4,665)	14%	(4,692)	-13%
<b>River margin</b>	<b>35</b>	<b>484</b>		<b>508</b>	
<b>Total margin</b>	<b>21,707</b>	<b>17,736</b>		<b>20,754</b>	
<b>Other revenue and expenses</b>					
Surcharge income	2,924	2,710	8%	2,782	5%
Other income	1,394	1,754	-20%	1,293	8%
Pilot training expenses	(2,549)	(3,235)	-21%	(2,680)	5%
Administrative salaries and benefits	(7,115)	(6,458)	10%	(6,672)	-7%
Other expenses	(5,178)	(4,809)	8%	(6,385)	19%
Depreciation	(6,264)	(4,160)	51%	(8,742)	28%
<b>TOTAL PROFIT (LOSS)</b>	<b>\$ 4,919</b>	<b>\$ 3,538</b>		<b>\$ 350</b>	

The principal changes in the actual results for 2025 compared to prior year and to plan are explained below:

1. Coastal pilotage revenues increased 12% from prior year due to full year of tankers calling at Westridge terminal following the opening of the expanded Trans Mountain pipeline in May 2024. Revenues were also 14% above the plan, as the number of tankers calling at Westridge was greater than planned. Increases and decreases in assignment volumes compared to prior year for key product sectors were as follows:

- Containers – 1%
- Grain – (1)%
- Petroleum – 85%
- Cruise – (3)%
- Coal – (2)%
- Forest Products – 5%
- Auto – 1%

The changes in coastal revenues compared to prior year are largely mirrored in the changes in coastal contract expenses, which vary directly with changes in assignment volumes.

Overall, the margins for coastal pilotage for 2025 were 11% of revenue, compared to 12% the prior year and planned. The decrease is due to a change in the mix of assignments.

2. Launch and helicopter revenues in 2025 were 22% above prior year because of a full year of the helicopter service for tankers departing from the Westridge terminal and from increased rates. Launch and helicopter expenses were up over the prior year by 10% largely because of repair costs for the Pacific Scout, a pilot launch, and helicopter operating costs. Margins improved to 29% for the period with the increased contribution from the helicopter service, above the prior year of 21% and at the planned margin of 29%. There was also \$4.2 million of depreciation and finance expenses in 2025 related to helicopter operations that are included in depreciation and other expenses below. These additional helicopter-related costs are associated with accounting for the helicopter contract as a right-of-use asset and corresponding lease liability.

3. Travel revenues were 16% above prior year because of increases in both assignments and service charge rates. The increase in pilot travel expenses was only 6% above prior year as the Authority managed to secure a lower air charter fee to Port Hardy for 2025. As a result, margins improved to 23% for 2025 compared to 15% the prior year and plan.

4. River pilotage revenues were 4% above prior year, through a combination of volume and rate growth. Margins declined to 1%, compared to 9% the prior year because of an increase in Fraser River pilot headcount to handle more assignments, which resulted in higher fixed costs.

5. Revenue from surcharges increased over the prior year because of the increase in assignments and rates.

6. Other income in 2025 includes our third full year of operation of the simulator, which we operate as a 50% partner in a joint venture with BC Coast Pilots. Our share of revenue generated by the simulator in 2025 was \$0.6 million, compared to \$1.0 million in the prior year.

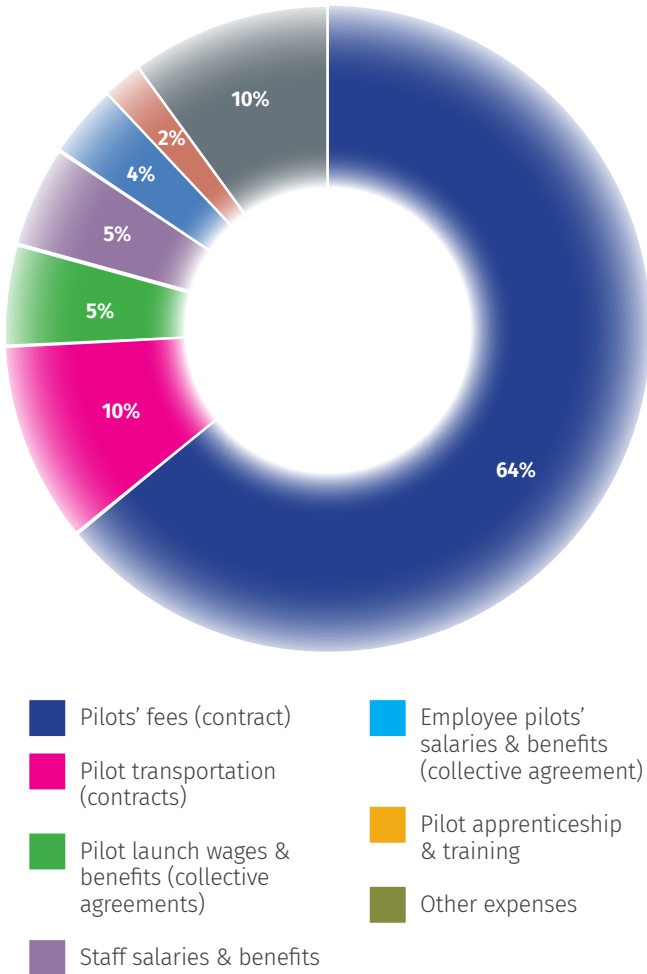

7. Coastal pilot and apprentice training costs were below the prior year by \$0.7 million, or 21%, because of less helicopter hoist training after the initial start-up in 2024 and a different mix of progression training required as pilots move through their levels of experience.

8. In 2025, we incurred overhead expenses of \$18.6 million for administrative salaries and benefits, depreciation, and other expenses, representing an increase of \$3.2 million over the prior year. Of this increase, \$2.1 million was for additional depreciation of a right-of-use asset and interest on a lease liability – both associated with the helicopter service contract supporting tankers departing from Westridge. The balance of the increase largely relates to an increase in wages and salaries from annual wage increases, additional positions to handle increased volume of assignments, and the prior year benefitting from savings resulting from turnover in some positions.

9. In our planned results, we had assumed for 2025 that we would have a contract in place for the northern helicopter services for pilot transportation for tankers calling at the new LNG Canada terminal in Kitimat. The contract would have been recorded as a right-of-use asset, with corresponding depreciation expense, and a lease liability with related interest costs in other expenses. As the potential helicopter service in the north has been delayed, both depreciation expense and other expenses were lower than planned in 2025.

The following chart compares the major expense categories, as a percentage of total expenses for the year 2025.

**ACTUAL EXPENSE CATEGORIES 2025**

As in prior years, approximately 80 percent of the Authority's total annual expenditures for the year were covered by either a service contract or collective agreements.

Since inception in 1972, the Authority has been required to operate on a financially self-sufficient basis and continues to manage its finances accordingly. An important element of maintaining self-sufficiency is holding an appropriate level of cash and investment reserves. These reserves are required to meet current liabilities, fund future capital commitments, and provide a buffer against significant unforeseen events with adverse financial consequences, such as the recent pandemic.

In December 2025, the Authority estimated that \$21 million in cash and investment reserves would be required in 2026 to meet working capital requirements, support near-term capital commitments, and maintain a reserve for business continuity in the event of a significant disruption. The Authority's cash and investment balance at the end of 2025 was \$22 million, slightly above the estimated requirement. We will continue to monitor our cash and investment reserves in the coming years to ensure they remain aligned with operational and financial requirements.

# LOOKING AHEAD TO 2026 AND BEYOND

Operationally, the Authority has forecast a 2% increase in assignments in 2026 over 2025 largely due to a full year of operations at LNG Canada's new terminal in Kitimat. In determining its service charge increases for 2026, the Authority based its forecast of revenues and expenditures for 2026 on 14,048 coastal and 1,245 Fraser River assignments, resulting in a forecast surplus for 2026 of \$1.3 million.

The potential of the projects and terminals proposed for the West Coast continues to show promise every year. We continue to actively monitor and remain aware of all projects proposed in our jurisdiction by analyzing the impact they might have on assignments, pilot numbers and pilot deployment methodologies. The Authority, with its Fraser River pilots, along with the BC Coast Pilots, is an active partner when new terminals or docks are proposed and constructed as part of major natural resource and infrastructure projects on the coast. Our subject matter expertise on design, location and navigational access and safety is regularly sought out at various phases of project development and implementation. Some of the major projects we are currently monitoring and engaged in are:

- The LNG Canada facility in Kitimat became operational in Q2 2025 and therefore 2026 will be the first full year of operations. This LNG export facility has a forty-year export license and is expected to initially export 14 million tonnes of LNG per annum to global markets.
- DP World Fraser Surrey has begun full operations at its new Canola Oil Transload Facility at Fraser Surrey marine terminal. The canola oil transloading facility is expected to add a throughput capacity of approximately one million tonnes per year.
- Development of the Woodfibre LNG terminal in Squamish, BC commenced in 2023. Substantial completion of the project is expected by 2027.
- Cedar LNG is a proposed floating LNG facility located on Haisla Nation-owned land in Kitimat, B.C. with the capacity to export three million tonnes per year of LNG. Early construction work is underway, and the project is expected to be in service in late 2028.

- The Ksi Lisims LNG floating LNG export facility owned by the Nisga'a Nation near the community of Gingolx north of Prince Rupert is expected to be ready by 2030.
- In Prince Rupert, a feasibility assessment is underway for a proposed second container terminal; Royal Vopak and AltaGas are evaluating the development of a large-scale LPG terminal on Ridley Island; and development is in progress for the South Kaien Logistics Park and Canxport infrastructure projects.

Our monitoring includes many other events, negotiations, legislation and similar activities that may affect our area of jurisdiction. Many of these events are outside of our control yet they may have implications for our jurisdiction. Some of these major events are:

- uncertainty with respect to tariffs and the economic effects of recent geopolitical events, which may continue to impact global trading patterns and volumes;
- discussions regarding replacement of a major tunnel in the Vancouver area that would affect vessel traffic in and out of the Fraser River;
- environmental impacts of climate change and the related effects on global trade (e.g. drought affecting shipping access through the Panama Canal).

*Our efforts in the coming years continue to be directed towards our vision of*

*'leading a world-class marine pilotage service on the west coast of Canada.'*

# STATEMENT OF MANAGEMENT'S RESPONSIBILITY

The accompanying financial statements have been prepared by the Pacific Pilotage Authority's management in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB), using management's best estimates and judgments, where appropriate. The Authority's management is responsible for the integrity and objectivity of the information in the financial statements and annual report.

Management maintains a system of internal controls designed to provide reasonable assurance that assets are safeguarded and controlled, transactions comply with relevant authorities and accounting systems provide relevant and reliable financial information on a timely basis. The system is also designed to provide reasonable assurance that transactions are in accordance with section 89 and Part X of the *Financial Administration Act* and regulations, the *Pilotage Act* and regulations, and the by-laws of the Authority.

The Board of Directors of the Authority is responsible for ensuring that management fulfils its responsibilities for financial reporting and internal control. The Board exercises this responsibility through a Finance and Audit Committee, which meets regularly with management and the external auditor. The financial statements and annual report are reviewed and approved by the Board of Directors on the recommendation of the Finance and Audit Committee.

The external auditor, the Auditor General of Canada, is appointed under the *Financial Administration Act* and the *Pilotage Act* to audit the financial statements in accordance with Canadian generally accepted auditing standards. Her report, which follows, outlines the nature of the audit and expresses her opinion on the financial statements of the Authority.

# INDEPENDENT AUDITORS REPORT

Office of the  
Auditor General  
of Canada

Bureau du  
vérificateur général  
du Canada

## INDEPENDENT AUDITOR'S REPORT

To the Minister of Transport

### Report on the Audit of the Financial Statements

#### *Opinion*

We have audited the financial statements of the Pacific Pilotage Authority (the Authority), which comprise the statement of financial position as at 31 December 2025, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Authority as at 31 December 2025, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB).

#### *Basis for Opinion*

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Authority in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### *Other Information*

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### *Responsibilities of Management and Those Charged with Governance for the Financial Statements*

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Authority's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Authority or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Authority's financial reporting process.

### *Auditor's Responsibilities for the Audit of the Financial Statements*

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Authority's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the

financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Authority to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## **Report on Compliance with Specified Authorities**

### *Opinion*

In conjunction with the audit of the financial statements, we have audited transactions of the Pacific Pilotage Authority coming to our notice for compliance with specified authorities. The specified authorities against which compliance was audited are Part X of the *Financial Administration Act* and regulations, the *Pilotage Act* and regulations, the by-law of the Pacific Pilotage Authority, and the directive issued pursuant to section 89 of the *Financial Administration Act*.

In our opinion, the transactions of the Pacific Pilotage Authority that came to our notice during the audit of the financial statements have complied, in all material respects, with the specified authorities referred to above. Further, as required by the *Financial Administration Act*, we report that, in our opinion, the accounting principles in IFRS Accounting Standards as issued by the IASB have been applied on a basis consistent with that of the preceding year.

### *Responsibilities of Management for Compliance with Specified Authorities*

Management is responsible for the Pacific Pilotage Authority's compliance with the specified authorities named above, and for such internal control as management determines is necessary to enable the Pacific Pilotage Authority to comply with the specified authorities.

### *Auditor's Responsibilities for the Audit of Compliance with Specified Authorities*

Our audit responsibilities include planning and performing procedures to provide an audit opinion and reporting on whether the transactions coming to our notice during the audit of the financial statements are in compliance with the specified authorities referred to above.

# NOTES TO THE FINANCIAL STATEMENTS

YEAR ENDED DECEMBER 31, 2025 (thousands of Canadian dollars)

## 1. Authority and objectives

The Pacific Pilotage Authority (the Authority) was established in 1972 pursuant to the *Pilotage Act*. The objectives of the Authority are to establish, operate, maintain and administer a safe and efficient pilotage service within designated Canadian waters.

The Authority is a Crown corporation named in Part I of Schedule III to the *Financial Administration Act* and is not subject to income taxes.

The pilotage charges set by the Authority for compulsory pilotage services are governed by the *Pilotage Act* and must be established in accordance with the charging principles within the *Pilotage Act*. The *Pilotage Act* provides that pilotage charges shall be set at levels that are fair and reasonable and that allow the Authority to be financially self-sufficient.

Coastal pilots are provided by British Columbia Coast Pilots Ltd. under an agreement for services. Fraser River pilots are employees of the Authority.

In July 2015, the Authority was issued a directive (P.C. 2015-1114) pursuant to section 89 of the *Financial Administration Act* to align its travel, hospitality, conference and event expenditure policies, guidelines and practices with Treasury Board policies, directives and related instruments on travel, hospitality, conference and event expenditures in a manner that is consistent with its legal obligations, and to report on the implementation of this directive in the Authority's next corporate plan. The Authority finalized its implementation of this directive effective January 2019 and confirms the requirements of the directive have been met throughout 2025.

The principal registered address and records office of the Authority are located at 1000-1130 West Pender Street, Vancouver, British Columbia.

## 2. Material accounting policy information

### 2.1 Basis of presentation

The financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB). The material accounting policy information used in the preparation of the financial statements is summarized below and in the following pages.

### 2.2 Joint operation

The Authority has classified its interest in a joint arrangement as a joint operation where the Authority has both the rights to assets and obligations for the liabilities of the joint arrangement. In its assessment of the classification of its interest in the joint arrangement, the Authority considered the structure, the legal form and the contractual terms.

The Authority accounts for its interest in the joint operation by recognizing its share of assets, liabilities, revenues and expenses in accordance with its contractually conferred rights and obligations.

### 2.3 Cash and cash equivalents

Cash comprises cash on hand, and Canadian dollar deposits held at Canadian chartered banks. Cash equivalents comprise short-term, highly liquid investments that are readily convertible into known amounts of cash and subject to an insignificant risk of changes in value. The Authority had no cash equivalents as at December 31, 2025 (2024 - nil).

### 2.4 Financial instruments

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities measured at fair value through profit and loss) are added to or deducted from the fair value of the assets or liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities measured at fair value through profit or loss are recognized immediately in profit or loss.

### Financial assets

The Authority's financial assets include cash, trade accounts receivable, other receivables and investments.

On initial recognition, the Authority classifies its financial assets as measured at amortized cost, fair value through other comprehensive income (FVOCI), or fair value through profit or loss (FVTPL).

Financial assets are reclassified subsequent to their initial recognition when the Authority changes its business model for managing those financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

Financial assets that are not designated as being measured at FVTPL are recorded at amortized cost or FVOCI as appropriate.

Financial assets are measured at amortized cost when both of the following conditions are met:

- (a) the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets are measured at FVOCI when both of the following conditions are met:

- (a) the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Authority's cash is initially recognized at fair value and subsequently measured at amortized cost.

Trade accounts receivable are initially recognized at the transaction price; other receivables are initially recognized at fair value; and both are subsequently measured at amortized cost using the effective interest method, less a provision for impairment when applicable. Receivables are considered individually for impairment when they are past due or when other objective evidence is received that a specific counterparty will default. Receivables that are not considered to be individually impaired

are reviewed for impairment in groups, which are determined by reference to the industry and region of the counterparty and other shared credit risk characteristics. The impairment loss estimate is then based on recent historical counterparty default rates for each identified group.

Since the objective of the Authority's investment policy is to hold investments and collect contractual cash flows on specified dates that are solely principal and interest on amounts outstanding, the Authority's investments are measured at amortized cost. Investments classified as measured at amortized cost are initially recognized at fair value and subsequently measured at amortized cost using the effective interest rate method. When required, the Authority recognizes a loss allowance for expected credit losses. Such losses are included in comprehensive income and reduce the carrying value of the related investments. Interest income and any gain or loss on de-recognition is included in comprehensive income.

### Financial liabilities

Financial liabilities are recognized when the Authority becomes a party to the contractual provisions of the financial instrument and are classified as measured at amortized cost, except for financial liabilities measured at fair value through profit or loss.

The Authority's financial liabilities include accounts payable and accrued liabilities, lease liabilities and borrowings, and are all classified as measured at amortized cost using the effective interest method. Financial liabilities are removed from the statement of financial position when the obligation specified in the contract is either discharged, cancelled or expires.

### 2.5 Property and equipment

Property and equipment are initially recorded at cost, and subsequently carried at cost less accumulated depreciation and any accumulated impairment losses. The cost of assets constructed by the Authority includes design, project management, legal, materials, interest on directly attributable construction loans and construction costs. Spare engines are carried at cost and will be depreciated when put in service.

Depreciation is recognized so as to allocate the cost or valuation of the assets less their residual values over their useful lives on a straight-line basis. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. The estimated useful lives of the Authority's assets are as follows:

Buildings and floats	10–20 years
Pilot boats	25 years
Pilot boat engines	10,250 running hours
Pilot boat generators	10 years
Equipment	
communication and other	4–10 years
computers	3 years
simulators	5–7 years
Leasehold improvements	lesser of 10 years or term of lease
Right-of-use assets	term of lease

With regard to simulators, communication and other equipment, the Authority's proportion of the cost of software purchased for its own use and which is integral to the hardware (because without that software the equipment cannot operate) is treated as part of the cost of the hardware and capitalized to property and equipment.

In addition, the Authority reviews the carrying amount of its non-financial assets, which include property and equipment, at the end of each reporting period to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets (the cash generating unit or CGU).

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value by applying a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its estimated recoverable amount. Impairment losses are recognized in comprehensive income.

Impairment losses recognized in prior periods are assessed at the end of each reporting period for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortization, if no impairment loss had been recognized.

## 2.6 Intangible assets

Acquired computer software, excluding software integral to

hardware, is recorded at cost and amortized on a straight-line basis over its estimated useful life of up to 10 years.

## 2.7 Leases

A lessee recognizes a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments.

### i. Determining whether an arrangement contains a lease

At the inception of an arrangement, the Authority assesses whether the arrangement is, or contains, a lease. An arrangement is, or contains, a lease if the arrangement conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether an arrangement conveys the right to control the use of an identified asset, the Authority assesses whether:

- the arrangement involves the use of an identified asset;
- the Authority has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Authority has the right to direct the use of the asset.

For practical expediency, the Authority has elected to:

- account for leases with a remaining term of 12 months or less as short-term leases and expense on a straight-line basis over the lease term; and
- account for lease payments as an expense and not recognize a right-of-use (ROU) asset if the underlying asset is of low dollar value.

### ii. Recognition and measurement of the right-of-use asset

For arrangements that contain a lease, the Authority recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset to its originally condition, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the

straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment.

### iii. Lease term

The lease term includes periods covered by an option to extend if the Authority is reasonably certain to exercise that option, as well as periods covered by an option to terminate the lease if the Authority is reasonably certain not to exercise that option. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

### iv. Recognition and measurement of the lease liability

The lease liability is initially measured at the present value of the lease payments that are unpaid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined the Authority's incremental borrowing rate will be used. All extension options have been included in the measurement of lease obligations where applicable. Payments for optional renewals or purchase options are included if they are reasonably certain to be made. Variable lease payments that depend on sales or usage are excluded from the lease liability and recognized in comprehensive income as incurred. Variable payments that depend on an index or rate are included in the lease liability based on the index or rate existing at each balance sheet date.

The lease liability is subsequently measured at amortized cost using the effective interest rate method. It is re-measured when there is a change in the Authority's estimate of the amount expected to be payable under a residual value guarantee, when there is a change in future lease payments arising from a change in a rate used to determine those payments, or if the Authority changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is re-measured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in comprehensive income or loss if the carrying amount of the right-of-use asset has been reduced to zero.

## 2.8 Employee benefits

### i. Pension benefits

All eligible employees of the Authority participate in the Public Service Pension Plan (the Plan), a multi-employer contributory defined benefit plan established through legislation and sponsored by the Government of Canada. Contributions are required by both the employees and the Authority to cover current service cost. Pursuant to legislation currently in place, the Authority has no legal or constructive obligation to pay further contributions with respect to any past service or funding deficiencies of the Plan. Consequently, contributions are recognized as an expense in the year when employees have rendered service and represent the total pension obligation of the Authority.

### ii. Other employee benefits

Management, unionized employees and the Fraser River pilots are entitled to sick leave benefits as provided for under collective agreements or employment contracts. Unionized employees are entitled to severance benefits accumulated up to March 31, 2018. The liability for these benefits is estimated and recorded in the financial statements as the benefits accrue to the employees.

The costs and the defined benefit obligation are actuarially determined using the projected unit credit method prorated on service that incorporates management's best estimate assumptions.

Actuarial gains and losses are recognized immediately in other comprehensive income.

## 2.9 Revenue recognition

The Authority recognizes revenue upon the transfer of control of promised services to customers at an amount that reflects the consideration to which the Authority expects to collect in exchange for the pilotage services it provides. The Authority has determined that control for pilotage services has passed when the pilot assigned to a vessel has completed the pilotage assignment, or the assignment is cancelled.

### 3. Significant accounting judgments and estimates

The preparation of financial statements requires the use of judgment in applying accounting policies and in making critical accounting estimates that affect the reported amounts of assets, liabilities, revenues and expenses. These judgments and estimates are based on management's best knowledge of the relevant facts and circumstances, having regard to previous experience, but actual results may differ from the amounts included in these financial statements. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which estimates are revised and in any future periods affected.

#### (a) Significant accounting judgments

##### Leases (Notes 2.7 and 12)

The application of IFRS 16, "Leases" requires the Authority to make judgments that affect the recognition and valuation of lease liabilities and right-of-use assets. These include determining contracts in scope of IFRS 16 and determining the contract term.

The lease term determined by the Authority comprises the non-cancellable period of lease contracts, periods covered by an option to extend the lease if the Authority is reasonably certain to exercise that option and periods covered by an option to terminate the lease if the Authority is reasonably certain not to exercise that option. This same term is applied to determine the depreciation term of right-of-use assets.

After the commencement date, the Authority remeasures the lease liability to reflect changes in the lease payments when the Authority is reasonably certain to exercise an option that would change the lease payments. The right-of-use asset is adjusted for the remeasurement of the lease liability.

#### (b) Significant accounting estimates

##### Depreciation – Property and equipment (Notes 2.5 and 7)

Significant components of property and equipment are depreciated over their estimated useful lives. Useful lives are determined based on current facts and past experience. While these useful life estimates are reviewed on a regular basis and depreciation calculations are revised accordingly, actual lives may differ from the estimates. As such, property and equipment may continue in use after being fully depreciated or may be retired or disposed of before being fully depreciated.

### 4. Financial risk management

The Authority, through its financial assets and financial liabilities, is exposed to the following risks from its use of financial instruments: credit risk, liquidity risk and market risks (i.e. interest rate risk, currency risk and other price risk). The Authority manages these risk exposures on an ongoing basis.

#### (a) Credit risk

Credit risk on financial instruments arises from the possibility that the issuer of a financial instrument fails to meet its obligation.

The carrying amount of cash, trade accounts receivable, other receivables and investments represents the maximum credit exposure.

The credit risk related to cash is minimized as these assets are held with a Canadian chartered bank.

The Authority's trade accounts receivable had a carrying value of \$6,524 (2024 - \$6,743) and other receivables had a carrying value of \$162 (2024 - \$483). There is no significant concentration of accounts receivable with any one customer. As at December 31, 2025, nil accounts receivable (2024 - nil) were over 90 days past due. Historically, the Authority has not incurred any significant losses with respect to bad debts. The risk of default is considered to be low as the *Pilotage Act* stipulates that the owner, master, and agent of a ship are jointly and severally liable for pilotage charges, and the Act provides a mechanism to withhold customs clearance if pilotage charges are unpaid. The Authority has recognized an expected credit loss allowance of nil at December 31, 2025 (2024 - nil) related to its accounts receivable.

Credit risk associated with investments at year end is considered to be low. The Authority has recognized an expected credit loss allowance of nil (2024 - nil) related to its investments, which are all investments in either GICs or bonds rated BBB- or higher.

#### (b) Liquidity risk

Liquidity risk is the risk that the Authority will not be able to meet its financial obligations as they become due. The Authority's objective is to have sufficient liquidity to meet these liabilities when due, under both normal and stressed conditions. The Authority monitors its cash balances and cash flows generated from operations on a frequent basis to meet its requirements.

The carrying amount of accounts payable, accrued liabilities, lease liabilities and borrowings represents the maximum exposure to liquidity risk.

Within the Authority's accounts payable and accrued liabilities,

trade payables and accrued liabilities had a carrying value of \$11,625 (2024 - \$10,809) and are all due within 60 days. The Authority's wages, employee deductions and banked time payable had a carrying value of \$5,836 (2024 - \$5,669) and are due on demand.

The Authority has credit facilities with a Canadian chartered bank (Note 10).

### (c) Market risks

#### (i) Interest rate risk

Interest rate risk arises because of the fluctuation in interest rates. The Authority is subject to interest rate risk on its cash and investments portfolio. Interest rate risk is minimized by managing the duration of the fixed-term investments portfolio. The interest rates on the investments are fixed. The investments will mature over the next two years.

Cash held during the year yielded a weighted-average interest rate of 2.88% (2024 - 4.81%).

As at December 31, 2025, a shift in interest rates of 100 basis points, assuming that all other variables had remained the same, would have resulted in an increase of \$145 (2024 - \$104) or a decrease of \$145 (2024 - \$104) in the Authority's comprehensive income from cash and investments for the year.

The Authority has limited exposure to interest rate risk on its borrowings. Borrowed funds are from a Canadian chartered bank, the entire balance of which is at a fixed rate of 2.86% which cannot be changed between maturity dates without financial penalty.

#### (ii) Currency risk and other price risk

The Authority is not presently exposed to any significant currency risk or other price risk. Accounts payable and accrued liabilities denominated in foreign currencies at year end were nil (2024 - nil).

## 5. Fair value of financial instruments

For financial reporting purposes, fair value measurements related to financial instruments which are measured subsequent to initial recognition at fair value are categorized into Level 1, 2 or 3. These levels are based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety. These are described as follows:

- Level 1—Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2—Inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly.
- Level 3—Inputs are unobservable inputs for the asset or liability.

The Authority's cash is Level 1 at December 31, 2025 and 2024.

The carrying values of the Authority's trade accounts receivable, other receivables and accounts payable and accrued liabilities approximate their fair values due to their short-term to maturity.

The fair value of investments at December 31, 2025 and 2024 is disclosed in Note 6. The Authority's investments are Level 2 at December 31, 2025 and 2024.

The fair value of the Authority's borrowings is determined by discounting the future cash flows of these financial obligations using December 31, 2025 market rates for debts of similar terms (Level 2). At December 31, 2025, the fair value of borrowings, is estimated to be \$3,454 (2024 - \$4,103). The fair value of the borrowings varies from the carrying value when there are fluctuations in interest rates since their issue.

## 6. Investments and investment revenue

### (a) Portfolio investments

<b>Total</b>	<b>4,089</b>	<b>3,977</b>	3,954	3,835

As at December 31, 2025, the investments have interest rates of 1.25% to 4.80%, with a weighted average rate of 2.62%, and have the remaining terms to maturity as follows:

	Remaining term to maturity		
	Within 1 year	1-3 years	Total
	\$	\$	\$
GICs	466	598	1,064
Government of Canada bonds	389	1,905	2,294
Corporate bonds	375	244	619
	<b>1,230</b>	<b>2,747</b>	<b>3,977</b>

### (b) Investment revenue

Year ended December 31	2025	2024
	\$	\$
Interest	98	44

### (c) Investment performance

The time-weighted rate of return during the year on these investments was 3.71% (2024 – 2.76%). The return is inclusive of realized gains and losses, deposit and coupon payments (interest), accrued interest received and paid for sales and purchases of bonds and accrued interest as at December 31, 2025.

## 9. Joint operation

In November 2022, the Authority entered into a jointly controlled arrangement with an arm's-length organization, BCCP Ventures Ltd., a wholly-owned subsidiary of British Columbia Coast Pilots Ltd. The purpose of the joint arrangement with BCCP Ventures Ltd. is to construct and operate a pilotage simulator facility in Vancouver, British Columbia. Each party to the joint arrangement has a 50% interest in the operation.

Summarized financial information for the joint operation is as follows:

	<b>2025</b>	2024
	<b>\$</b>	\$
Current assets	<b>716</b>	1,001
Non-current assets		
Property and equipment	<b>837</b>	1,030
<b>Total assets</b>	<b>1,553</b>	2,031
Current liabilities	<b>25</b>	375
Equity	<b>1,528</b>	1,656
<b>Total liabilities and equity</b>	<b>1,553</b>	2,031
<b>Year ended December 31</b>	<b>2025</b>	2024
	<b>\$</b>	\$
Revenue	<b>1,160</b>	1,955
Net income (loss)	<b>(129)</b>	290

The Authority has included its proportionate share (50%) of the above amounts in these financial statements.

## 10. Borrowings

The Authority has an operating credit facility of up to \$3,500 available at an interest rate equivalent to the bank's prime lending rate. The Authority has not drawn on this facility as at December 31, 2025 (2024 - nil). The credit facility is available to the Authority as required and has no renewal date or fixed term.

On December 22, 2021, the Authority entered into an unsecured committed operating loan facility to provide financing for the construction of a pilot boat. The \$5,400 loan has a term of 10 years and an annual interest rate of 2.86%. As at December 31, 2025, the principal outstanding is \$3,677 (2024 - \$4,498).

The estimated undiscounted principal repayments on outstanding borrowings as of December 31, 2025 are as follows:

	\$
2026	343
2027	352
2028	362
2029	373
2030 and thereafter	2,247
	<u>3,677</u>

Interest expense on borrowings during the year was \$124 (2024 - \$133).

## 11. Pension benefits

All eligible employees of the Authority are covered by the Public Service Pension Plan (the Plan). Contributions are required by both the employees and the Authority. The President of the Treasury Board of Canada sets the required employer contributions based on a multiple of the employees' required contributions.

The Government of Canada holds a statutory obligation for the payment of benefits relating to the Plan. Pension benefits generally accrue up to a maximum period of 35 years at an annual rate of 2 percent of pensionable service times the average of the best five consecutive years of earnings. The benefits are coordinated with Canada/Québec Pension Plan benefits and they are indexed to inflation.

The Plan was amended during 2013 which raised the normal retirement age and other age-related thresholds from age 60 to age 65 for new members joining the plan on or after January 1, 2013. For members with start dates before January 1, 2013, the normal retirement age remains 60.

Effective January 1, 2025, the general contribution rate for the year was 1.01 to 1 of employee contributions for employees hired prior to January 1, 2013 and 1.00 to 1 of employee contributions for employees hired after December 31, 2012 (2024 - 1.02 to 1 and 1.00 to 1, respectively) for every dollar contributed by the employee. If an employee's salary was greater than \$210 (2024 - \$202), the portion of the employee's salary above this amount was subject to a contribution rate of 5.09 to 1 of employee contributions (2024 - 4.63 to 1).

Contributions to the Plan consisted of:

	2024	2023
	\$	\$
Contributions by the Authority	1,246	1,260
Contributions by employees	977	973

The Authority expects to make employer contributions of approximately \$1,290 during 2026.

## 12. Leases

### (a) Leases as a lessee

The Authority leases facilities, including office space, a helicopter, and leases of berthage and moorage space for pilot boats.

### (b) Right-of-use assets

	Facilities	Helicopter	Berthage and moorage space	Total
	\$	\$	\$	\$
Balance at January 1, 2024	1,768	—	23	1,791
Additions	—	22,382	328	22,710
Depreciation	(147)	(1,453)	(44)	(1,644)
Balance at December 31, 2024	1,621	20,929	307	22,857
Additions	—	—	—	—
Depreciation	(138)	(3,283)	(66)	(3,487)
Balance at December 31, 2025	1,483	17,646	241	19,370

### (c) Amounts recognized in profit or loss and in the statement of cash flows

Interest expense on lease liabilities is \$1,069 (2024 - \$750).

Expenses and cash paid for leases of low-dollar value items and short-term leases are \$131 (2024 - \$114). Variable lease payments not included in the measurement of the lease liabilities were nil (2024 - nil).

Interest payments of \$1,069 (2024 - \$750) and principal payments of \$2,996 (2024 - \$1,316) are classified in the statement of cash flows as finance costs paid and principal payments on leases, respectively.

### (d) Lease liabilities

The Authority's lease liabilities consist of:

	2025	2024
	\$	\$
Balance, beginning of year	23,753	2,359
Additions during the year	—	22,710
Principal repayments	(2,996)	(1,316)
Total lease liabilities	20,757	23,753
Current portion	3,240	2,995
Long-term portion	17,517	20,758
Total lease liabilities	20,757	23,753

The annual undiscounted lease payments for the next five years and thereafter are as follows:

	\$
2026	4,164
2027	4,245
2028	4,326
2029	4,376
2030 and thereafter	6,661
Total undiscounted lease payments	23,772

Included in the undiscounted lease payments are payments of \$20,999 for a helicopter lease with a term of 7 years ending May 15, 2031, with an option to renew the lease after that date for an additional three years. The Authority may elect to terminate the lease agreement for any reason with at least 85 days written notice.

## 13. Reconciliation of liabilities arising from financing activities

The Authority's liabilities from financing activities comprise bank loans and lease liabilities.

	2025	2024
	\$	\$
Finance liabilities, beginning of year	28,251	7,164
Cash used for debt payments	(821)	(307)
Cash used for lease payments	(2,996)	(1,316)
Additional lease liabilities (Note 12)	—	22,710
Finance liabilities, end of year	24,434	28,251

## 14. Capital management

The Authority's capital is its equity, which is comprised of retained earnings. Equity is represented by net assets.

The Authority is subject to the financial management and accountability provisions of the *Financial Administration Act*, which imposes restrictions in relation to borrowings. On an annual basis the Authority must receive approval of all borrowings from the Minister of Finance. During the years ended December 31, 2025 and 2024, the Authority complied with these restrictions.

The *Pilotage Act* provides the Authority the power to invest any moneys not immediately required for the purposes of the Authority in any class of financial asset. Approval for the Authority to invest in either Government of Canada, provincial or municipal government bonds, fixed income instruments with at least a BBB- credit rating or GICs was granted by the Minister of Finance through approval of the Authority's 2025-2029 Corporate Plan.

The Authority manages its equity as a by-product of managing its revenues, expenses, assets, liabilities and general financial dealings to ensure that its objectives are achieved efficiently.

## 15. Related party transactions

Details of the transactions between the Authority and other related parties are disclosed below.

### (a) Trading transactions

The Authority is related in terms of common control with all Government of Canada created departments, agencies and Crown corporations. The Authority enters into transactions with these entities in the normal course of business, under the same terms and conditions that apply to unrelated parties. The transactions are recorded at the exchange amount, which approximates fair value, and do not have a material effect on these financial statements.

The Authority entered into an arrangement with Transport Canada beginning April 1, 2020 for the provision of regulatory services and expertise. This is an on-going arrangement subject to review every 10 years. The costs incurred are included in the statement of comprehensive income for the year ended December 31, 2025 with \$1,108 (2024 - \$964) under professional and special services.

### (b) Compensation of key management personnel

Key management personnel of the Authority include the members of the Board of Directors and senior executives of the Authority. The remuneration of key management personnel included the following:

Year ended December 31	2025	2024
	\$	\$
<b>Executive management compensation</b>		
Short-term employee benefits, including salaries	1,373	1,364
Post-employment benefits	134	158
	<b>1,507</b>	1,522
<b>Board compensation</b>		
Retainer and per diems	201	220

The Authority also engaged a Board member to provide assistance with pilot training at hourly rates equivalent to market-based rates from unrelated parties. The Authority paid the Board member \$42 during 2025 (2024 - \$35).

## 16. Commitments

The Authority has entered into contracts for navigation equipment service support, and pilot transportation and accommodation requiring the following future minimum payments as at December 31, 2025:

	\$
Less than one year	1,012
Between one and five years	478
More than five years	—
	<b>1,490</b>

# CLIMATE-RELATED FINANCIAL DISCLOSURES REPORT FOR 2025 (UNAUDITED)

This is the Authority's second annual report on climate risks, its strategy to mitigate these risks, and metrics associated with these risks. The report has been modelled on recommendations issued by the Task Force on Climate-related Financial Disclosures.

The core elements for disclosure are:

- **Governance** - the organization's governance around climate-related risks and opportunities
- **Strategy** - the actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning
- **Risk management** - the processes used by the organization to identify, assess, and manage climate-related risks
- **Metrics and targets** - the metrics and targets used to assess and manage relevant climate-related risks and opportunities

These disclosures will evolve over time with greater information, data and lessons learned.

The Authority is also in the process of aligning its strategy for managing the impact of climate risks with the government's [Greening Government Strategy](#).

## Governance

The Authority has a well-established governance framework. Its Board of Directors is responsible for the overall stewardship of the Authority and oversees the identification and management of key risks.

The Board's oversight of climate-related risks and opportunities is an element of the Board's oversight of the PPA's Enterprise Risk Management System (ERMS), further discussed below. Pursuant to the Authority's ERMS, management is responsible for identifying and evaluating climate-related risks and opportunities. These risks and opportunities are presented to the Board, along with other key risks, at least once a year. Management also reports climate-related metrics and targets to the Board annually.

The Finance and Audit Committee has been assigned the responsibility of overseeing the financial disclosure requirements for climate-related risks.

## Strategy

The Authority aspires to be a leader in a complex and environmentally sensitive maritime industry – where safe and efficient movement of goods is conducted in a manner that protects the marine environment on the west coast of Canada and facilitates maritime trade.

The Authority will seek opportunities that support the Government of Canada's goal of its operations producing net-

zero greenhouse gas ("GHG") emissions by 2050 and enhancing climate resilience by minimizing the risk to disruption of the Authority's critical assets and services from climate-related impacts.

Net-zero emissions mean reducing GHG emissions from operations to as close to zero as possible and then balancing out any remaining emissions with an equivalent amount of carbon dioxide removal, which could include purchasing carbon offsets.

Operating a coast-wide pilotage model in BC means that over 80% of our GHG emissions come from transporting personnel by launch and helicopter to and from vessels at boarding stations along the coast. As a result, this presents the greatest opportunity to substantively reduce GHG emissions and we will prioritize research in this area. In doing so, we will also consider potential additional benefits, such as cost reductions and service improvements.

Climate-related impacts to and opportunities for the Authority are identified via its Enterprise Risk Management (ERM) program and are considered as part of its strategic and corporate planning processes. These are assessed over the short, medium and long-term and where it can do so, the Authority seeks to adjust its plans to mitigate the impacts and capitalise on any opportunities.

## Risk Management

The Authority has an active and ongoing Enterprise Risk Management (ERM) program whereby strategic and operational risks, including climate-related risks, are assessed, monitored and managed in an Enterprise Risk Management System (ERMS).

A register of risks is maintained by a management ERM committee comprising the CEO and key managers. Each risk is assigned to an owner. A review of all risks is performed biannually, and a status report provided to the Board.

Each of the risks is analysed and causes identified. Existing controls are identified and are tracked and monitored to maximise the Authority's mitigation and to maintain risks within the Authority's stated tolerance levels. Additional controls are developed to improve mitigation where necessary.

### The Authority's Climate Risk

This refers to the risk of the Authority failing to meet the expectations of stakeholders, customers and the community to address the impacts of climate change on its operations. This has been identified as a key risk to the Authority. Its related impacts fall broadly into four categories:

- The impact of climate change to operations which could be short, medium or long term. For example:
  - Damage to infrastructure from more frequent and severe storms, flooding etc.
  - Potential for more navigational challenges and longer routes to avoid newly problematic areas due to shifting currents and channels - increased potential for accidents and grounding of vessels
  - Increased training costs (e.g. refresher courses, simulator reprogramming) and providing accurate data to pilots.
- The impact of climate change on the Canadian and global economy and the potential to impact assignment levels which could be short, medium or long term. For example:
  - The effect of climate change in the Prairies which could reduce grain and agricultural exports
  - The proposed federal oil and gas industry emissions cap which could affect oil exports
  - The shift from the use of fossil fuels to renewables could affect coal exports
- Long term strategic impacts. For example:
  - Melting of Arctic ice, which could open newly competitive ports to the West Coast
- Impact of not meeting commitments to meet net zero by 2050
  - The Government of Canada's [Greening Government Strategy](#) sets out expectations that the Authority will advance measures that support Canada's transition to net-zero, including developing related operational targets. Failure to do so will damage the Authority's reputation and potentially relationships with stakeholders, customers and the community.

### Climate Risk Mitigations

Mitigations for the identified climate risks are constantly being developed. They include:

- Factoring the potential impact of climate change on assignment numbers as part of strategic planning.
- Maintaining a well diversified assignment portfolio as a hedge against volatility in any one sector.
- Minimising fuel usage by leveraging improvements in technology and engineering when replacing pilot launch vessels, and optimising the fuel efficiency of older vessels.
- Other initiatives including:
  - Procurement practices that encourage suppliers to submit environmentally-friendly solutions.
  - Replacing in-person meetings with on-line equivalents.

### Metrics and Target

The Authority engaged a third party (BMO Radicle) to assist in assessing greenhouse gas emissions for 2023, for the purpose of establishing a baseline. The Authority will continue to measure its emissions going forward and will disclose these in our climate-related financial disclosures. Once more data is available regarding the Authority's current emissions, it will develop interim targets leading up to 2050.

This report and inventory were compiled in compliance with the Greenhouse Gas Protocol Corporate Accounting and Reporting Standard, Revised Edition.

The Authority measured its first greenhouse gas inventory in 2023 using BMO Radicle's Climate Smart program and recorded emissions of 4,671 tonnes of carbon dioxide equivalent (tCO<sub>2</sub>e). Overall, in 2023 the Authority's largest source of emissions was from transporting people, principally pilots to and from assignments along the BC coast, by water on its launches (85%) and by air on scheduled and chartered flights (8%).

In 2025, total emissions increased by 11% over 2023 to 5,174 tonnes of carbon dioxide equivalent (tCO<sub>2</sub>e) whilst pilotage assignments increased by 13% over the same period. Therefore, although total emissions increased, emissions per assignment have decreased by 3%.

The following sections present the breakdown of PPA's emissions for the 2025 calendar year by scope. Each finding has been compared with the 2023 baseline result.

**Scope 1: Direct emissions generated from activities owned or controlled by the Authority.**

Activity Type	Baseline (2023)		Current Year (2025)		Current vs Baseline	
	(tCO2e)	% of Emissions	(tCO2e)	% of Emissions	(tCO2e)	% change
Heat (consumption of Vancouver office)	11.01	0%	10.99	0%	(0.02)	-%
Transporting People - Water (transportation of pilots to vessels via owned launches)	3,948.10	85%	3,887.07	75%	(61.03)	(2)%
Transporting People - Air (transportation of pilots to vessels via helicopter)	-	-	577.44	12%	577.44	n/a
<b>Totals</b>	<b>3,959.11</b>	<b>85%</b>	<b>4,475.50</b>	<b>87%</b>	<b>516.39</b>	<b>13%</b>

**Scope 2: Indirect emissions generated from consumption of purchased electricity, heat, or steam.**

a) Location-Based Emissions

Activity Type	Baseline (2023)		Current Year (2024)		Current vs Baseline	
	(tCO2e)	% of Emissions	(tCO2e)	% of Emissions	(tCO2e)	% change
Electricity (consumption of Vancouver office and Victoria and Prince Rupert stations)	2.33	0%	1.43	0%	(0.9)	(39)%
<b>Totals</b>	<b>2.33</b>	<b>0%</b>	<b>1.43</b>	<b>0%</b>	<b>(0.9)</b>	<b>(39)%</b>

b) Market-Based Emission Factors

Province – BC

Electricity Provider - BC Hydro

	kWh	Provincial Emissions (tCO2e)	Utility Supplier Emissions (tCO2e)
<b>Baseline (2023)</b>	77,731 <sup>1</sup>	2.33	2.33
<b>Current Year (2025)</b>	91,550	1.43	1.43
<b>Current vs Baseline</b>	13,819	(0.90)	(0.90)

<sup>1</sup>: previously reported incorrectly as 150,363

**Scope 3: Other indirect emissions from upstream and downstream activities that the PPA contributes to but does not control.**

Activity Type	Baseline (2023)		Current Year (2025)		Current vs Baseline	
	(tCO2e)	% of Emissions	(tCO2e)	% of Emissions	(tCO2e)	% change
Accommodations	42.09	1%	42.02	1%	(0.07)	-%
Heat (heat consumption of Victoria station)	4.99	0%	0.05	0%	(4.94)	(99)%
Transporting People – Air (scheduled and charter flights transporting pilots to coastal assignments)	385.48 <sup>1</sup>	8%	379.55	7%	(5.93)	(2)%
Transporting People – Water (transportation of pilots to vessels via 3rd party launches)	277.10 <sup>2</sup>	6%	275.09	5%	(2.01)	(1)%
<b>Totals</b>	<b>709.66</b>	<b>15%</b>	<b>696.71</b>	<b>13%</b>	<b>(12.95)</b>	<b>(2)%</b>

<sup>1</sup>: previously reported incorrectly as 406.54

<sup>2</sup>: previously reported incorrectly as 11.93
